To,
Dear Hiring Manager,

It is with great professional enthusiasm that I approach intending to explore the opportunity, as the Software Developer/Programmer while in pursuit of a Masters in Computer Science from Stevens Institute of Technology and expected graduation in May 2021, I am well-prepared to align my skills and knowledge from my experience with any position that requires a proactive individual who strives for innovation and continuous improvement.

My resume is enclosed for your review; highlights include:

- In the past two months, I have been working in new verticals such as Computer vision and Drone programming with Python and have completed several projects within, also acquired certifications for AWS and IBM Watson
- Devised a workflow of conversion for product's value in various currencies to the latest US dollar leveraging RPA technology using the UiPath tool
- Created a web-based platform to share about local and more value-adding news/events in surroundings as well as events creating global impact using JavaScript and other web tools
- Developed a stand-alone project to come up with a solution for the visually impaired, resolving communication and disability of fluency in interact with the surrounding environment and people
- Built Chess in Virtual Reality using Unity3D and Blender, Led team of 5 with Feature Driven Development approach to the goal with a 43% cost reduction and 80% acceptance rate.
- Designed and engineered a robotic fish for surveillance, a generic model with appropriate sensors and equipment can be suited for a wide range of applications from surveillance to strategic infiltration
- Developed Media Player to stream audio-video content on devices through routers making use of pen drives as storage devices to stream access stored content.
- Utilized power of OCR and designed application to detect handwritten notes and convert into digital notes, to store and share across network seamlessly

I possess outstanding time-management skills and work well in team-driven environments. You will find me to be a highly productive individual, quick to grasp essential procedures and protocols, and possessing the stamina to do whatever it takes to complete the task set before me with integrity.

Should these characteristics and a solid work ethic be a good fit with your company, I would look forward to an opportunity to discuss my qualifications in detail. Until then, thank you for your time and consideration.

Sincerely,

Regards,
Shubham Rane
